Winx Elevates Vox Populi Award to New Level

by Steve Haskin

The racing world is shrinking. We have seen horses from Europe come to the United States on a regular basis for years and win our top turf races, and on occasion top dirt races. This year alone we saw the sensational filly Enable become the first horse to win the Prix de l'Arc de Triomphe and Breeders' Cup Turf in the same year, and we also saw the Irish-trained Mendelssohn go to Dubai and win the UAE Derby by a staggering 18 1/2 lengths and then make an unprecedented six transatlantic trips in 2018, running in the Kentucky Derby, and then finishing on the board in the Travers Stakes, Jockey Club Gold Cup, Cigar Mile, and Dwyer Stakes, and also finishing a respectable fifth, beaten only four lengths, in the Breeders' Cup Classic after setting a rapid pace. And he made his first transatlantic trip last fall, winning the Breeders' Cup Juvenile Turf.

But that bridge between the U.S. and the rest of the world expanded to 10,000 miles this year, not from a foreign horse's heroics on an American racetrack, but because of what a remarkable mare from Australia was able to accomplish in the minds and hearts of American racing fans. The Secretariat Vox Populi Award, created by Secretariat's owner Penny Chenery in 2010, annually recognizes the horse whose popularity and racing excellence best resounded with the general public and gained recognition for Thoroughbred racing. With approximately 80% or higher of the votes coming from the States each year, it was not a surprise that the award had been won every year by an American horse ... until now.

The thought of a 7-year-old Australian mare being more popular with American racing fans than the undefeated Triple Crown winner boggles the mind, and made the Vox Populi Award truly a global award, expanding horizons even Penny Chenery couldn't have dreamed of.

So just how did Winx, winner of all seven of her starts

How did she beat out Triple Crown winner Justify in America by 11 percentage points? In short, how did she manage to win this award with only 6% of the votes coming from Australia?

Australian-born Murray Johnson, who trained in America for 20 years, saddling Perfect Drift to a number of major stakes victories and earnings of more than \$4.7 million before moving back to Australia several years ago, hit the proverbial nail on the head.

"It is surprising that she would win," he said. "I think it shows how the internet has changed things. Winx is a freak and (trainer) Chris Waller and his team have done an amazing job to keep the streak going. My list of great horses I've seen race grows longer and Winx is right up the list."

To demonstrate the following Winx had in the States, seconds after one of her victories, Twitter would light up with congratulations,

On Aug. 17, at 1:08 a.m. ET, immediately following Winx's victory in the Winx Stakes, TVG, which televised Winx's races live, posted the following tweet: "#WINX makes history with 26 consecutive wins in the race named in her honor." That tweet remains TVG's top tweet of the year in analytics with 888 likes and 327 retweets, according to senior producer Becky Witzman-Somerville.

This is a mare who Americans never saw in person, racing in a country we have little connection with. We witnessed a similar worldwide affection several years ago for the great Australian sprinter Black Caviar. And Winx has been able to build on that, especially competing in major distance races and displaying a late burst of speed that was unlike anything seen before.

As a result, she is now part of American racing, showing that heroes need not be seen in the flesh if their spirit can be felt halfway around the world.

In addition, Merck has agreed to partner with the USTA, for free, a lifetime subscription to their HomeAgain rescue services, which is a proactive network of veterinarians, rescue facilities and volunteers who are immediately notified in an attempt to help locate lost animals. The program maintains owner contact information that proactively prompts owners to update it during the annual membership renewal process and through other member communications. This is an added benefit for horses that are in need of rescue or connected via the USTA's Full Circle program.

There are multiple reasons why microchips are a superior means of identification including:

- Microchips in general offer a faster/more efficient and less stressful means of identification and require less time to implant than freeze branding or lip tattooing, providing greater convenience for farm visits.
- Can measure a temperature in only a few seconds compared to rectal reading that might take several minutes.

Individual Recap Last Race Footnotes

MUCHO MACHO MAN
Parked eighth, pushed before yielding, chased to lane, urged along cones, fair. Gerry in the bike.

LUCKY IVAN
Cover near half, not a good lead up trip, some drive, just fair. Adds Gary, in for \$3000 tonight, thusly a better post.

ALLAMERICAN SOLO
Left hard, pushed before yielding, chased balance, not a late danger. Longshot type.

REGINA BEACH
Left, took back to tuck, gapped far turn, driven, no rally. Luke's choice. Slice maybe?

TORNADO HENRY
Left 3wide, parked hard eighth plus, attacked by winner far turn, faded from hard use. Mooney's choice. Obvious danger.

LINCOLN
Sat in whole trip, cleared traffic into lane, driven, only fair. Dean will steer here. Thought.

CAVIART SPENCER
Left 3-4wide to midturn tuck, back out past half, kept marching on rim, urged to hold. Solid form. Another must use.

PL JALAPENO
Sat in the trip, behind last turn gapper, cleared, urged, useful tuner. Negative post switch. Still can get near.

A BAY BAY
Parked eighth to drop, back out near half, cover far turn, followed 3wide into lane, solid rally. Steve returns. What's his strategy?

- Is a safe, unobtrusive way to uniquely identify individual horses.
- Provides a less stressful way to alert owners of health problems through temperature sensing (EHV-1), which makes preventive care easier.
- Allows for monitoring temperature during and after surgery or procedure, where minimal disturbance is desired.
- Alerts owner to possible sub-clinical indications of potential infectious diseases.
- Ideal for both young and pregnant stock.

Improved technology has eliminated the concerns about the microchip moving after implantation. With Merck's patented Bio-Bond® process, the microchips are encased in an insert micro-capsule made of bio-compatible material. The process enables the animal's tissue to permanently anchor the microchip at the desired anatomical site. HomeAgain/Destron Fearing microchips stay where they should for the health of the animals and for reading convenience.

WRANGLER CAT
Led at once, braked while untested to top of the lane, urged to hold off pocketeer. Price obviously drops now.

PERFECT PITCH
Broke approaching the start, lost too much ground to recover. Let's excuse the bobble. Major player.

DUET
Came from last into far turn, raced up on the train, driven, failed to rally. Rene's choice. Post relief.

NUTMEGS DESIRE
Sent under light urging, took command mid turn, yielded to quarter moving winner, stalked balance, easy 2nd best. Tighter too, gimmick must.

DANDYS DUDUDIDUDU
Into the pocket behind winner from outset, shadowed to the lane, urged, almost. One more to toss on your ticket.

POORLITTLERICHGIRL
Bided time to half, popped out into far turn, advanced on pace slowing winner, stalled bit late. Mark returns to steer.

AWESUM WORLD
Tracked along rail whole trip, followed top pair, little urging, safely 3rd. Moves outside. What's her plan?

ROCKINAROUNDHEAVEN
Followed cover into far turn, good lead up trip, urged, just fair late stages. Tighter now? Has flashed speed in the past.
